# Greenhouse gases worksheet pdf

## The Greenhouse Effect

All the following labels in the diagram are for the purpose of identifying the greenhouse effect.

### Earth Science Worksheet - Greenhouse Effect

The diagram below shows a greenhouse.

- What is the primary function of the clear glass of the greenhouse?
  - To allow the sun's rays to enter the greenhouse.
  - To allow the sun's rays to enter the greenhouse, but to prevent the heat from escaping.
  - To allow the sun's rays to enter the greenhouse, but to prevent the heat from escaping.
  - To allow the sun's rays to enter the greenhouse, but to prevent the heat from escaping.
- What is the solar radiation absorbed by Earth's surface is later radiated back into space as which type of electromagnetic radiation?
  - Infrared
  - Visible
  - Ultraviolet
- Which material absorbs the most solar radiation?
  - grass field
  - road
  - concrete

## The Greenhouse Effect

Remember, which works in our classrooms

Labels in diagram: Sun, Earth's surface, Greenhouse gases, Heat radiation, Trapped heat.

Clouds in diagram:
 

- Carbon Dioxide (CO<sub>2</sub>)
- Water Vapor
- Methane (CH<sub>4</sub>)
- Other Trace Gases

Icons: Car, House, Cow, Greenhouse.

Classify the table below into renewable and non-renewable energy resources

Renewable	Primary non-renewable	Secondary non-renewable

Hydrogen, Oil, Nuclear, Wind, HPP, Solar, Oil, Wave Power, Geothermal, Coal, Biomass/wood waste, Wood, Charcoal

## Demonstrating the Greenhouse Effect

Learn how the greenhouse effect works with this practical science activity for fifth grade.

**You will need:**

- 2 small thermometers
- Glass container or jar
- Watch or clock
- Notebook
- Pen
- Sunny area

**Instructions:**

- Place both thermometers under direct sunlight.
- Let the thermometers rest for about five minutes to adjust to the temperature before reading them.
- Record the both temperatures and the time of the reading in your notebook.
- Now place one thermometer in the glass container and replace the lid.
- Place both thermometers under direct sunlight once more. Make sure the container's shadow doesn't fall on the other thermometer.
- Every ten minutes, record the temperature readings and the time in your notebook. Do this without touching the thermometers.
- Compare the difference in temperature between both thermometers.

**What's happening?**

The atmosphere around the exposed thermometer changes constantly and blends with warm as well as cool air. The air inside the jar is trapped and unable to circulate. It only gets warmer in direct sunlight. The greenhouse effect works in a similar way – solar energy comes in, gets trapped and transforms into thermal energy that can't escape out of the atmosphere.

How To Train Your Dragon © 2014 DreamWorks Animation LLC. All Rights Reserved.

- Answer the following questions based on the reading.
- Match the top that radiates from the earth to the atmosphere?
  - What is the main reason that the earth is warmer than it would be without the atmosphere?
  - What is the main reason that the earth is warmer than it would be without the atmosphere?
  - What is the main reason that the earth is warmer than it would be without the atmosphere?

Thank you in advance. Tools specific to each country: Customized for select developing countries. We recently launched the GHG Emissions Calculation Tool (GHG Emissions Calculation Tool), a free Excel-based tool of the Greenhouse Gas Protocol and WRI that helps companies estimate their greenhouse gas (GHG) emissions based on the GHG Protocol. If 3 then emissions should be estimated. There are different resources to navigate through the GHG Protocol tools: Cross-sectoral tools: Applicable to many industries and companies regardless of sector. Secure .gov websites use HTTPS A lock or https:// means that you have securely connected to the .gov website. To help us improve this free resource, please share your feedback on this tool with us in this short survey. Most companies need to apply more than one instrument to cover their emissions. Tools for countries and cities: These tools help countries and cities track progress toward their climate goals. Our tools enable companies to develop comprehensive and reliable inventories of their GHG emissions. Companies should consult the Corporate Reporting and Accounting Standard 2 the GHG Protocol for guidance 2 the entire inventory development process. Sectoral instruments: Designed primarily for the specific sector or industry listed, but may be applicable to other situations. Share confidential information 2 official and secure websites only. Below is 2 a complete list of all the tools developed by GHG Protocol. Official websites use .gov A .gov website belongs to an 2 official United States government organization. The calculation of emissions A process in several stages. Only an exact and useful inventory can then be drawn up from paying careful attention to quality control issues and activity data required. Many tools are accompanied by an orientation document in PDF format, which provides a detailed guide on the use of a tool and must be consulted first. Each one one. It reflects the methods of best practices that have been widely tested by industry experts.
